ADVANCED SKIN THERAPY PRICE LIST

IPL Rejuvenation Pigmentation and Redness

| Area | Fee |
|---|-------|
| Full face | \$250 |
| Half Face | \$200 |
| 3 Areas (face, neck and décolletage) | \$600 |
| Hands | \$150 |
| Hands and arms | \$350 |
| Chest | \$250 |
| Neck | \$200 |
| Neck and chest | \$350 |

Microdermabrasion

45min \$130

Microdermabrasion is a controlled exfoliation treatment which uses micro-crystals for various levels of skin re-surfacing. Skin re-surfacing improves scarring, open pores, wrinkles, sun-damaged skin, hyper-pigmentation, some stretch marks and improves general skin health.

Microdermabrasion Package

Purchase 6 and get \$180 off

Oxy-Fusion Facial

45min \$120

A brightening and detoxifying treatment that stimulates blood circulation, leaving you with a youthful, glowing complexion.

Treat your skin with an oxygen boost for special occasions.

Diamond Microdermabrasion and Sonophoresis Treatment

60min \$150

Resurfaces the skin with microdermabrasion, followed by a brightening sonophoresis session. The ultrasonic technology, warmth and motion energy of sonophoresis works perfectly with microdermabrasion to increase the absorption of active skincare ingredients.

Deluxe Oxy-Fusion Facial and Microdermabrasion

90min \$150

Resurface and hydrate in one go. This deluxe treatment eliminates dead skin cells, leaving you with healthy, hydrated new skin.

Skin Tyte

From \$350 area

Skin Tyte is an IPL treatment using infrared energy to deeply heat dermal collagen. This Uniform Heating effectively targets the desired area and immediately stimulates collagen contraction and remodeling, resulting in firmer, tighter, more youthful skin appearance.

Laser

At Sculpt, all of our laser procedures are individually tailored to the nature of the problem to be corrected.

| | Fee |
|--------------------------------------|--------|
| Micro-laser Peel (Weekender Peel) | \$800 |
| Pro-fractional Laser | \$2000 |
| Laser Re-surfacing | \$4500 |

RESTORATIVE AND COSMETIC SURGERY

BREAST

Breast Augmentation

A breast augmentation is a surgical procedure used to increase the size of breasts. The procedure will also correct slight sagging of the breasts and can increase breast firmness. Women who feel their breasts are smaller than normal, out of proportion to their body size, unequal in size or have decreased in size following pregnancy, will opt to have an augmentation. Following mastectomy, some woman might consider breast augmentation for reconstruction purposes.

Breast Lift

A breast lift is a procedure that can re-shape sagging breasts and improve contour. It can also increase the firmness of soft breasts by removing excess skin. Women who would like to raise the position of downward pointing nipples or to reduce the size of the areolas will opt to have a Breast Lift.

Breast Reduction

Breast reductions are usually requested by women who want to reduce the size of their breasts due to neck and/or back pain. Women who also feel that they are unable to get clothes to fit and have difficulty exercising will opt for a breast reduction.

BODY

Liposuction

Liposuction is requested by people to remove excess fat from various areas of their body that is difficult to shift despite a healthy diet and exercise.

LipoSoft

Liposoft is a revolutionary liposuction technique that allows more accurate body contouring under a local anesthetic. This procedure is suitable for treatment to the thighs, tummy, upper arms, neck, buttocks, knees, calves and ankles.

Abdominoplasty (Tummy Tuck)

An abdominoplasty is a surgical procedure to remove excess skin and fat when diet and exercise are not helping. The procedure removes tissue from the middle and lower abdominal wall. Abdominal muscles may be tightened and abdominal hernias can be fixed. The belly button is repositioned.

Total Body Lift

A body lift is performed to remove excess skin and fat from the abdomen and back. This procedure is often performed on patients who have lost large amounts of weight. Other areas that can be addressed are thighs and arms as part of the body lift.

FACE

Face Lift

Face lifts are performed to address the signs of facial ageing. The procedure tightens loose skin, jowling and facial wrinkles. It does not improve wrinkles around the mouth, chin or around the eyes.

Neck Lift

A Neck lift is a surgical procedure to improve neck contour by removing excess and sagging skin or fat.

Blepharoplasty

Blepharoplasty is a surgical procedure on the upper and/or lower eyelids designed to remove excess skin folds and bulging fat bags to improve eye appearance. The procedure rejuvenates the periorbital region but will not improve wrinkles of the cheeks, temples or forehead. It also does not correct problems caused by drooping eyebrows.

Rhinoplasty

A rhinoplasty is a surgical procedure to change the shape of the nose. This includes straightening, hump removal, nose tip reshaping or addressing breathing difficulties.

Ear Pinning

An otoplasty is a surgical procedure to correct prominent ears by setting them back closer to the head. Some people get embarrassed at the look of their ears and this procedure will give a person more confidence with their appearance.
